Listed below are Northcoast Sports' Power Play Rankings. These Power Play Rankings are unique. Our rankings are unlike any computer ranking, as we take into account all the following: Strength of Opponents, Individual Units (Rushing Offense, Rushing Defense, Passing Offense, and Passing Defense) Garbage Yards,

, ,	ther, Injuries, Home Field Edges, and successful Unbalanced Attacks. Regular rankings based solely on numbers DO NOT take into account these factors.

2011 TOUGHEST OPPONENT UNIT'S FACED

WHAT ARE THE TOUGHEST OPPONENT RANKINGS? These rankings go far beyond the NCAA's straight statistical ranking of each team. For example last year Notre Dame ranked #89 in the NCAA in rush defense allowing 170 ypg, but ranked #40 in our rush defense rankings because they faced the toughest schedule of rush offenses in the NCAA LY. As you can see, the NCAA's statistical rankings can be misleading. In the upcoming weeks we'll provide examples of this year's statistical disparities. These are the current rankings for this year. Here are the teams that have took on the toughest & easiest schedules last year.

NOTE: Power Plays - PP COLLECT FOOTBALL October 6th - October 8th, 2011 5* GOESTHIS WEEKEND!

Welcome to this week's issue of Power Plays. The Power Plays Newsletter consists of forecasts that are made by a special Power Plays rating system. This is a system developed many years ago and we regard it very highly. In our final analysis of the plays the Power Plays forecast takes up anywhere from 25 to 30% of our total analysis. You will see in the Power Plays Newsletter in the write-ups that we agree with the majority of the Power Plays forecasts. However, there are times when we will disagree with the Power Plays forecasts. We want to make it clear that this is the Power Plays Newsletter and these forecasts are based purely on the power ratings. You should never use just one method, system or angle to determine your handicapping. The times that we disagree with the Power Plays Newsletter we will clearly note it. If the Power Plays rating is strong enough to be a 4* Play, yet we are on the other side of the game, we will clearly state that we like the other side of the game.

IND was slated to switch to Painter on MNF & those results aren't figured in here. WR Bowe attributed KC's slow start due to the lack of OTA's which was compounded by 2 key offensive injuries (Moeaki/Charles). Breaston has 7 rec's for 146 yds the L2W & Cassel had more passing yds (247) than in his 1st 2 gms combined TY (221). This is the Eagles "spare QB Bowl" with McNabb vs Kolb. Despite MIN tailoring its offense to McNabb the Vikings are 28th in pass yds and 27th in yds per pass. Kolb has ARZ with the #14 pass offense & 13th in yds per pass. Cardinals DC Horton noted prior to the Giants that he had to trim 80% of his playbook down due to no OTA's and it shows as they are 25th on that side. MIN's #19 defense has been in HC Frazier's system for 5 years but the secondary is a problem. Both teams blew halftime leads LW with BUF losing on the final play to CIN as they haven't solved their issues vs the run yet (#26). PHI gave up its biggest halftime lead since Sept 1999 in their loss despite a career game by Vick (480 total yds). PHI does have a big edge in terms of DC's and household names here but have glaring weaknesses at LB/S. BUF is dead last in sacks per pass att (1 every 38) which combined w/ their run defense and a manageable line has us disagree w/ PP here.

DC Phillips has the Texans allowing 54 ypg & 9.2 ppg less after the 1st Qtr of the ssn vs 2010. OAK tallied 504 yds in their loss to NE LW but were beaten at their own game as they were outrushed 183 (6.1) to 160 (5.9). JAX's QB shuffle is compounded by an OL giving up 1 sack every 12.4 att's, the lack of depth at WR leading to the Jags being outscored 51-6 in the 2H (MIN 77-16). Due to a poor home following (41k LW), another rebuilding phase & a lack of players drawing attention to themselves CIN is under the radar right now.
