THE MOST UNIQUE POWER RATINGS IN THE COUNTRY

These Power Play Forecasts are the most unique in the country because they are based on **Northcoast Sports' Private Power Ratings**. Our ratings are unlike any computer rating, as we take into account all of the following: Strength of Opponents Individual Units (Rushing Offense and Defense, Passing Offense, & Defense, Scoring Offense and Defense, Garbage Yards, Weather, Injuries, Home Field Edge, and Successful Unbalanced Attacks). Here is how each is reflected:

Strength of Opponent: Our ratings do not just take the opposing team's overall power rating into account. For example, last year, Florida Atlantic's defense vs the rush was rated at 119. They faced Alabama and allowed "just" 256 yds rushing and **dropped 5 spots** in the national overall defensive ratings. However, Power Plays took into account the potent Crimson Tide run attack and had forecasted the Owls yielding 289 yds. Due to the fact they did better than the forecast, Power Plays raised their rating to 112 even though they slipped in the national (straight yardage) rankings. Another example last season was Wisconsin vs UTEP. Wisconsin held UTEP to just 77 yards rushing and stayed the same in the overall defense in the national statistics. However, our ratings had them rated at 15 and moved them down, as they should have yielded just 50 yards to a weak UTEP rush attack. Next time an announcer on TV tells you that a certain team is #3 in the country vs the run **you better check Northcoast Sports' Power Ratings and see how good a rush defense they really have!** The top twenty ratings in Power Ratings for each offensive and defensive category will be listed in each week's issue of Power Plays.

Garbage yards: These are yards that a team gains or allows in the final minutes of a game when it has been decided. For example, Team A is ahead 63-0 and allows 93 yards passing for a TD vs its fourth string defense. These yards are **counted** into national ratings, **but not in Northcoast Sports' Power Ratings!**

Weather: If a game is played in miserable weather conditions and is low scoring, the straight statistics credit the defense with outstanding performances. Our Power Ratings reflect the conditions and do not give excess credit to the defenses.

Injuries: When Missouri played Vanderbilt last year, Tigers QB James Franklin was injured early in the game. His backup, who had seen very little action (rFr), was not prepared and hit on 30%, 9-30 passes. The offensive coordinator simplified the offense. In the national statistics Vanderbilt's overall defense **MOVED UP 8 NOTCHES**. In Phil's Power Ratings they **went from #11 dropping out of the Top 15**, as the poor performance WAS NOT reflective of an outstanding performance by the defense.

Home Field Edges: The weekly projection of yards and points is weighted with the home field factored in.

Successful Unbalanced Attacks: Last season, Tulsa was held to 155 yards passing vs Houston. This dropped Tulsa in the national passing offense ratings & **RAISED** the Cougars in the pass defense ratings. In our ratings the two units **remained** rated around the same. Why? Tulsa rushed for 350 yards & **DID NOT HAVE TO RELY ON THE PASS** & when they did they hit 18 of 32. While Houston's pass defense looked good in the national ratings, only Northcoast Sports' Power Ratings reflected the TRUTH!

There you have it. More than just numbers, THESE RATINGS REFLECT the true strength of each unit and allow them to have **the most accurate forecast of yards gained and points allowed in the country! No other rating system takes into account all the previous factors.** Next time you hear that a team is rated third in the country in pass defense, just remember, yards are not everything and Northcoast Sports' Power Plays will show you how strong the team really is.

NORTHCOAST SPORTS PLUS OR MINUS POWER RATINGS

The Power Ratings listed below are not based on the Power Plays, they are based on last year's final computer power rating numbers with the pluses and minuses from the off season changes factored in. They are then adjusted during the course of the season based on the final score of the games that are played on a weekly basis. The Power Ratings listed below can be used for you as a base power ratings to forecast up coming lines and strength of opponents, etc. Once again, they are not based on Power Plays and **they differ from what we have shown in recent years**, which has been our actual computer Power Ratings. These are Northcoast Sports Plus or Minus Power Ratings.

2020 COLLEGE POWER PLAYS RANKINGS

Listed below are Northcoast Sports' Power Play Rankings. These Power Play Rankings are unique. Our rankings are unlike any computer ranking, as we take into account all the following: Strength of Opponents, Individual Units (Rushing Offense, Rushing Defense, Passing Offense, and Passing Defense) Garbage Yards, Weather, Injuries, Home Field Edges, and successful Unbalanced Attacks. Regular rankings based solely on numbers DO NOT take into account these factors.

2020 TOUGHEST OPPONENT UNIT'S FACED

These rankings go far beyond the NCAA's straight statistical ranking of each team. For example in '12 Notre Dame ranked #89 in the NCAA in rush defense allowing 170 ypg, but ranked #40 in our rush defense rankings because they faced the toughest schedule of rush offenses in the NCAA in '13. As you can see, the NCAA's statistical rankings can be misleading. In the upcoming weeks we'll provide examples of this year's statistical disparities. These are the current rankings for this year. Here are the teams that have taken on the toughest & easiest schedules last year.

NOTE: Power Plays - PP

COLLEGE FOOTBALL DEC 17TH- DEC 23RD

The Power Plays Newsletter consists of forecasts that are made by a special rating system. You will see in the write-ups that we agree with the majority of the PP forecasts. However, there are times when we will disagree. We want to make it clear that this is the PP Newsletter and these forecasts are based purely on the power ratings. If the PP's rating is strong enough to be a 4★ Play, yet we are on the other side of the game, we will clearly state that we like the other side of the game. With all that said here are this week's PP Selections.

The Battle for the Old Oaken Bucket is moved to this week after Covid postponed LW's matchup. PP is giving the Hoosiers a solid edge here with a 23 pt win and a 427-318 yd edge. The loss of QB Penix for Indiana has us leaning with the visitor however as Purdue has gone 7-1 ATS as an AD.

With UAB getting some of their depleted roster back in this one (only 43 scholarship players available LW), it wouldn't surprise us to see an outright upset this time around.

Boise is 14-0 SU vs the Spartans but SJSt has actually covered the L/2 mtgs. PP calls for Boise to win by a TD, but the yards to be even! First meeting. GSthrn is playing in their 3rd bowl under HC Lunsford, splitting the 2 prior games. LT has won 6 straight bowl games under HC Holtz, pulling outright upsets in each of the last 3. The Panthers have the edge on offense, defense & ST's so it's not surprising that GSthrn is projected to win by 12 points. Normally we would never dare go against HC Holtz as an underdog, especially in a bowl game, but LT has a depleted roster and they don't get much time to prep for a unique option offense. The opening Vegas line is only a fg and we think the Panthers cover that easily.

PRO FOOTBALL DECEMBER 17th - 21st

Power Plays is based upon statistical numbers and rankings that are used to develop the projections you see here. As with all types statistical information the more numbers that one inputs ordinarily the stronger the accuracy of the results. Therefore, one would expect the projections to be more reliable after a number of weeks worth of stats are input. The numbers in parenthesis are a comparison of the teams rankings (Visitor, visitors offense ranking vs home defense ranking, Home home offensive ranking vs visitor defensive ranking) over each teams last 4 games.

PHILADELPHIA	307	134	173	20	-8	#18
ARIZONA	356	137	219	26	+3	#25

(PHI #25 vs ARZ #5, ARZ #26 vs PHI #17) - PHI earned a victory over the Saints in rookie QB Hurts' 1st career start. ARZ also picked up a win LW holding the Giants to just 7 pts on the road. While PP gives ARZ a 5 pt edge, it's too close to the line to make this a selection.

(KC #1 vs NO #4, NO #11 vs KC #22) - PP is calling for the hometown Saints to grab a 6 pt win in this one. However, with KC needing a victory here to stay atop the AFC and it also being unclear whether or not NO will have Brees back from injury, we'll pass in this one.
NO PLAY: NEW ORLEANS 28 KANSAS CITY 22

SAN FRANCISCO	390	149	241	26	-6	#15
DALLAS	306	106	200	25	-10	#14

(SF #14 vs DAL #22, DAL #21 vs SF #6) - The 49ers have fallen on hard times the past few wks including a loss to WAS last Sunday. DAL meanwhile picked up an easy win LW in CIN and has gone 5-0 ATS at home as a dog. We agree with the forecast above.

PITTSBURGH	345	81	264	26	+9	#24
CINCINNATI	249	68	181	13	-10	#8

(PIT #24 vs CIN #15, CIN #32 vs PIT #3) - The Steelers need to get back on track after losing 2 in a row after their 11-0 start. CIN meanwhile has nothing to play for and lost their franchise QB a few wks ago to injury. PP calls for PIT to claim a 13 pt win which is right at the opening line. We'll be passing on this one.
