**You better check Northcoast Sports' Power Ratings and see how good a rush defense they really have!**

The national (straight yardage) rankings. Another example last season was Wisconsin vs UTEP. Wisconsin held UTEP to just 77 yards rushing and stayed the same in the overall defense in the national overall defensive ratings. However, Power Plays took into account the potent offense and dropped 5 spots reflecting the conditions and do not give excess credit to the defenses.

Our ratings are unlike any computer ratings. Our ratings do not just take the opposing team's overall power rating into account. For example, last year, Florida Atlantic's defense vs the rush was rated at 119. They faced Alabama and allowed just 25 yds rushing and dropped 5 spots in the national defensive ratings. However, Power Plays took into account the potent Crimson Tide run attack and had forecasted the Owls yielding 269 yds. Due to the fact they did better than the forecast, Power Plays raised their rating to 112 even though they slipped in the national (straight yardage) rankings. Another example was Wisconsin vs UTEP. Wisconsin held UTEP to just 77 yards rushing and stayed the same in the overall defense in the national overall defensive ratings. However, our ratings had them rated at 15 and moved them as they should have yielded just 50 yds to a weak UTEP rush attack. Next time an announcer on TV tells you that a certain team is #3 in the country vs the run you better check Northcoast Sports' Power Ratings and see how good a rush defense they really have! The top twenty ratings in the Power Plays offensive category will be moved based on the outcome of Power Plays.

**Garbage yards.** These are yards that a team gains or allows in the final minutes of a game when it has been decided. For example, Team A is ahead 63-0 and allows 93 yards passing for a TD vs its fourth string defense. These yards are counted into national ratings, but not in Northcoast Sports' Power Ratings!

Weather: Our ratings are played in miserable weather conditions and is low scoring, the straight statistics credit the defense with outstanding performances. Our Power Ratings reflect the conditions and do not give exces credit to the defenses.

**Injuries:** When Missouri played Vanderbilt last year, Tigers QB James Franklin was injured early in the game. His backup, who had seen very little action (rFr), was not prepared and ran for just 33 yds. The offensive coordinator used the natural offensive formation in this situation and Vandy was Iowa's overall defense moved UP & OUT. Phili's Power Ratings they went from #11 dropping out of the Top 15, as the poor performance was NOT reflective of an outstanding performance by the defense.

**Home Field Edge:** The huge projection of yards and points is weighted with the home field factor.

**Successful Unbalanced Attacks:** Last season, Tulsa was held to 165 yds passing vs Houston. This dropped Tulsa in the national passing offense ratings & RAISED the Cougars in Strength of Opponent.

The Power Ratings listed below can be used for you as a base power ratings to forecast up coming lines and strengths of opponents, etc. Once again, they are not based on Power Plays and they differ from what we have shown in recent years, which has been our actual computer Power Ratings. These are Northcoast Sports Plus or Minus Power Ratings.

2020 TOUGHEST OPPONENT UNITS FACED

What are the toughest opponent rankings?

These rankings go far beyond the NCAA’s straight statistical ranking of each team. For example in ‘12 Notre Dame ranked #9 in the NCAA in rush defense allowing 170 yds, but ranked #40 in our rush defense rankings because they faced the toughest schedule of rush defenses in the NCAA in ’13. As you can see at the NCAA’s statistical rankings can be misleading. In the upcoming weeks we’ll provide examples of this year’s despite statistical disparities. These are the current rankings for this year. Here are the teams that have took on the toughest & easiest schedules last year.

**Note:** Power Plays - PP

**Collegiate Football OCT 22nd - Oct 24th**

The Power Plays Newsletter consists of forecasts that are made by a special rating system. You will see in the write-ups that we agree with the majority of the PP forecasts. However, there are times when we will disagree. We want to make it clear that this is the PP Newsletter and these forecasts are based purely on the power ratings. If the PP’s rating is strong enough to be a 4, we bet on the PP outcomes on the other side of the game. With all that said here are this week’s PP Selections.

Pitt ply'd w/ Pitt Pickett last week but settled for 5 fg's and lost by 12 vs Miami with nearly even yards. ND had a lackluster offensive effort vs L'ville. PP calls for ND to win by a td but we think they will by over 2 td as Hou hung up by 11 last week and are struggling to put away an ECU team missing their QB.

POWER RATING PLAY OF THE WEEK: DENVER

Ttl Yds Rush Pass Points TO's ST's
Denver (KC #4 vs DEN #12, DEN #29 vs KC #21) - The Chiefs head to DEN on short rest following a MNF trip to BUF. DEN meanwhile picked up a surprising upset in NE. While PP calls for this matchup to be close, it’s worth mentioning that KC is on a 7-1 ATS series run.
