THE MOST UNIQUE POWER RATINGS IN THE COUNTRY

These Power Play Forecasts are the most unique in the country because they are based on **Northcoast Sports' Private Power Ratings**. Our ratings are unlike any computer rating, as we take into account all of the following: Strength of Opponents Individual Units (Rushing Offense and Defense, Passing Offense, & Defense, Scoring Offense and Defense, Garbage Yards, Weather, Injuries, Home Field Edge, and Successful Unbalanced Attacks). Here is how each is reflected:

Strength of Opponent: Our ratings do not just take the opposing team's overall power rating into account. For example, last year, Florida Atlantic's defense vs the rush was rated at 119. They faced Alabama and allowed "just" 256 yds rushing and **dropped 5 spots** in the national overall defensive ratings. However, Power Plays took into account the potent Crimson Tide run attack and had forecasted the Owls yielding 289 yds. Due to the fact they did better than the forecast, Power Plays raised their rating to 112 even though they slipped in the national (straight yardage) rankings. Another example last season was Wisconsin vs UTEP. Wisconsin held UTEP to just 77 yards rushing and stayed the same in the overall defense in the national statistics. However, our ratings had them rated at 15 and moved them down, as they should have yielded just 50 yards to a weak UTEP rush attack. Next time an announcer on TV tells you that a certain team is #3 in the country vs the run **you better check Northcoast Sports' Power Ratings and see how good a rush defense they really have!** The top twenty ratings in Power Ratings for each offensive and defensive category will be listed in each week's issue of Power Plays.

Garbage yards: These are yards that a team gains or allows in the final minutes of a game when it has been decided. For example, Team A is ahead 63-0 and allows 93 yards passing for a TD vs its fourth string defense. These yards are **counted** into national ratings, **but not in Northcoast Sports' Power Ratings!**

Weather: If a game is played in miserable weather conditions and is low scoring, the straight statistics credit the defense with outstanding performances. Our Power Ratings reflect the conditions and do not give excess credit to the defenses.

Injuries: When Missouri played Vanderbilt last year, Tigers QB James Franklin was injured early in the game. His backup, who had seen very little action (rFr), was not prepared and hit on 30%, 9-30 passes. The offensive coordinator simplified the offense. In the national statistics Vanderbilt's overall defense **MOVED UP 8 NOTCHES**. In Phil's Power Ratings they **went from #11 dropping out of the Top 15**, as the poor performance WAS NOT reflective of an outstanding performance by the defense.

Home Field Edges: The weekly projection of yards and points is weighted with the home field factored in.

Successful Unbalanced Attacks: Last season, Tulsa was held to 155 yards passing vs Houston. This dropped Tulsa in the national passing offense ratings & **RAISED** the Cougars in the pass defense ratings. In our ratings the two units **remained** rated around the same. Why? Tulsa rushed for 350 yards & **DID NOT HAVE TO RELY ON THE PASS** & when they did they hit 18 of 32. While Houston's pass defense looked good in the national ratings, only Northcoast Sports' Power Ratings reflected the TRUTH!

There you have it. More than just numbers, **THESE RATINGS REFLECT** the true strength of each unit and allow them to have the **most accurate forecast of yards gained and points allowed in the country! No other rating system takes into account all the previous factors.** Next time you hear that a team is rated third in the country in pass defense, just remember, yards are not everything and Northcoast Sports' Power Plays will show you how strong the team really is.

NORTHCOAST SPORTS PLUS OR MINUS POWER RATINGS

The Power Ratings listed below are not based on the Power Plays, they are based on last year's final computer power rating numbers with the pluses and minuses from the off season changes factored in. They are then adjusted during the course of the season based on the final score of the games that are played on a weekly basis. The Power Ratings listed below can be used for you as a base power ratings to forecast up coming lines and strength of opponents, etc. Once again, they are not based on Power Plays and **they differ from what we have shown in recent years**, which has been our actual computer Power Ratings. These are Northcoast Sports Plus or Minus Power Ratings.

Power Plays is based upon statistical numbers and rankings that are used to develop the projections you see here. As with all types statistical information the more numbers that one inputs ordinarily the stronger the accuracy of the results. Therefore, one would expect the projections to be more reliable after a number of weeks worth of stats are input.

ATLANTA	299	132	167	13	-6	#21
GREEN BAY	311	98	213	20	-2	#14

GB gets only a +12 total-yard edge, with ATL holding a +34 rushing advantage, so the computer's 7-point GB win has little room for error. QB Michael Penix Jr. is back under center after ATL's ugly wk2 showing, a change the computer is not accounting for that should lift the Falcons' passing output and tighten the matchup. We'll pass on TNF.

WASHINGTON	217	93	125	5	-1	#8

SEA brings a massive +106 total-yard edge, including +119 through the air, and the computer calls for a 16-point win. With QB Jayden Daniels out, WAS turns to QB Marcus Mariota against a SEA D allowing only 9 PPG; QB Drew Lock (19/26, 235 yds, 3 TD) and WR Jaxon Smith-Njigba (9-155, 3 TD) are rolling. This aligns well and makes SEA a PP!

CINCINNATI	320	97	224	16	+3	#17
PITTSBURGH	321	77	244	17	+1	#10

PIT owns just a 1-yard overall edge, while CIN gets a +20 rushing edge and a +2 turnover margin. QB Joe Burrow has CIN off to a clean start, but QB Aaron Rodgers and PIT have the right AFC North home spot to make this physical; the computer's 1-point call is too tight to separate the sides. We'll skip it.

DETROIT	297	79	218	22	+2	#22

DET gets only a +3 total-yard edge, although its passing edge is +45, and the computer has DET by 8. QB Jared Goff and WR Amon-Ra St. Brown can certainly answer after BUF, but the NYJ rushing edge and elite special teams keep this closer than the projection makes it look. Pass.

NYG projects for a +121 total-yard edge and a 7-point win, but QB Jameis Winston is expected to start with QB Jaxson Dart out. That major QB change is not built into the computer's forecast, making the apparent NYG edge far less reliable. We'll stay away.
